

UPCOMING SEMINAR

Incident Investigation Seminar

Investigating incidents is a key component of an effective IIPP. Thorough investigation of all incidents and near misses will help you identify causes and needed corrections; and can help you determine why incidents occur, where they happen, and any trends. Such information is critical to preventing and controlling hazards and potential incidents.

What you will learn in this seminar includes:

- Building the case for conducting incident investigations – leadership support.
- Recommended support structure – essential resources.
- Critical elements of an investigation process – root cause analysis.
- Learn how to effectively implement your strategy – beyond the basics.

Actual incident investigation scenarios will be reviewed to demonstrate the practical applications of the concepts presented during the course.

Featured Presenter:

Jeff Hulson, ARM, CEES
Director, Risk & Loss Advisors, MMA
